

KLT-USB1A-OV10635 V1.0

OmniVision OV10635 USB Schnittstelle Fixer Fokus 1MP M12 Kameramodul

Kameramodul Nr.	KLT-USB1A-OV10635 V1.0	
Bildsensor	OV10635	Output Format: MJPG, YVY2
EFL	2.3 mm	15 FPS 1280 x 720 (HD 720P)
F.NO	2.5	15 FPS 640 x 480 (0.3MP VGA)
Pixel	1280 x 800	15 FPS 320 x 240 (0.07MP)
Blickwinkel	170°	Supporting OS
Linsentyp	1/2.7 Zoll	Windows 7, 8.1, 10, Vista
Objektivabmessungen	13.70 x 13.70 x 20.92 mm	Windows XP SP2 under UVC
Modulgröße	30.50 x 28.50 mm	Linux Kernel V2.6.2.1 or later
Modultyp	Fixer Fokus	MAC OS 10.4 or later
Schnittstelle	USB 2.0	Operating Voltage: 5V +/- 5%
IMT-Objektivmodell	IMT-1B12E005-6	Compliant with UVC Version 1.0

Passendes USB-Kabel Teile-Nr. KLT-USB1A-Cable

USB-Kabelverlängerungskabel. Separat erhältlich.

OV10635 HD HDR product brief

Megapixel, Color HDR Sensors for Advanced Automotive Display and Sensing Applications

available in a lead-free package

The OV10635 system-on-chip (SoC) sensor raises the standard in automotive imaging by combining megapixel resolution with color HDR. The AEC-Q100 qualified OV10635 comes with a full set of automatic controls and an image processing pipeline for display and sensing applications. Ideally suited for wide field of view and multi-camera applications, the OV10635 also incorporates special features and output formats for automotive machine vision applications. With its proprietary capability to simultaneously deliver high image quality and superior scene information, the OV10635 is designed for automotive applications that perform vision and sensing functions in tandem.

The sensor is built on a 4.2-micron OmniPixel3-HS™ pixel, enabling best-in-class low-light sensitivity of 3.65 V/lux-sec to capture detail-rich, high-definition color video in any environment. Using a proprietary new high dynamic range (HDR) concept and processing technology, this automotive sensor delivers excellent scene reproduction in the most demanding lighting conditions, achieving a dynamic range up to 115 dB in color and black-and-white. The OV10635 not only has the ability to accurately reproduce high-contrast scenes, but also employs auto dynamic range control to adjust to changing lighting and scene conditions to produce a clear, detailed and low-noise

color image in any automotive situation. A proprietary approach to generating HDR images also dramatically reduces or eliminates many typical HDR image sensor artifacts such as motion ghost artifacts and other unwanted effects.

The OV10635 offers all required automatic image control functions, including automatic exposure control, automatic white balance, automatic black level calibration, as well as defective pixel correction, gamma correction and lens shading correction. The sensor supports a digital video parallel port, and provides full-framed or windowed 10- or 8-bit YUV and 10- to 18-bit combined HDR RAW output format with complete user control over formatting and output data transfer.

Camera functions are programmable through the serial camera control bus (SCCB) interface. Additional features include a horizontal and vertical windowing capability, external frame sync capability, 50/60 Hz flicker cancellation and low power consumption.

The OV10635 comes in a 7.8 mm x 7.1 mm aCSP package.

Find out more at www.ovt.com.

Applications

- Automotive
 - 360° surround view
 - automotive machine vision
 - lane departure warning
 - traffic sign recognition
 - automatic high beam control
 - object detection
- pedestrian detection
- rear view camera
- blind spot detection
- mirror replacement
- occupant sensor
- night vision

Product Features

- support for image sizes:
 - WXGA (1280x800)
 - HD 720p (1280x720)
 - WVGA (752x480)
 - VGA (640x480)
 - 600x400
 - CIF (352x288)
 - QVGA (320x240)
- support for output formats: YUV and separated and combined RAW
- parallel DVP interface
- high sensitivity
- automatic exposure/gain
- horizontal and vertical windowing capability
- auto white balance control
- aperture/gamma correction
- serial camera control bus (SCCB) for register programming
- low power consumption
- external frame sync capability
- 50/60 Hz flicker cancellation
- defective pixel correction

OV10635/OV10135

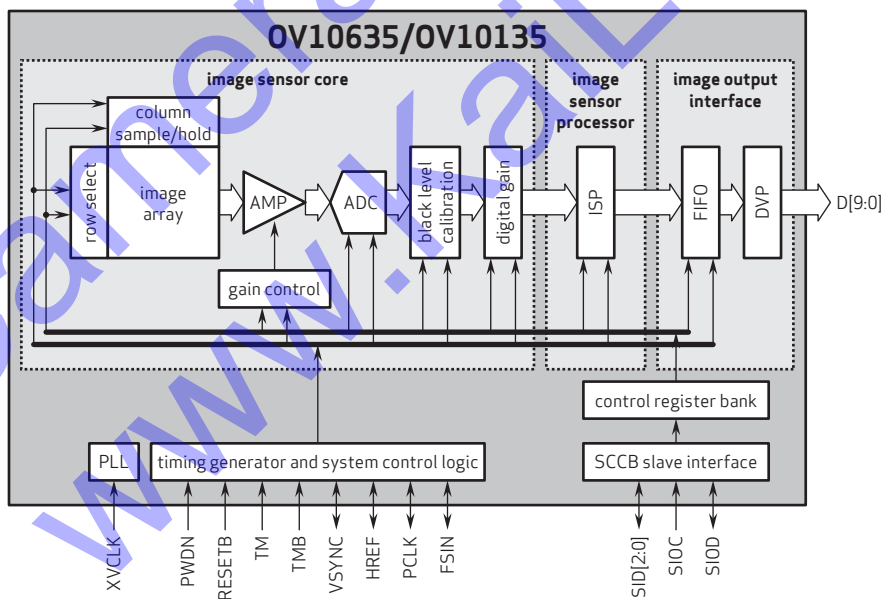

Ordering Information

- OV10635-N29Y-PB**
(color sensor with protective film in tray, lead-free, 129-pin aCSP™)
- OV10635-N29Y-RB**
(with protective film in tape and reel, lead-free, 129-pin aCSP™)
- OV10135-N29Y**
(b&w sensor with protective film in tray, lead-free, 129-pin aCSP™)

Product Specifications

- active array size:** 1280 x 800
- lens chief ray angle:** 9°
- power supply:**
 - core: 1.425 - 1.575V
 - analog: 3.14 - 3.47V
 - I/O: 1.7 - 3.47V
- power requirements:**
 - active: 485 mW typical @ 3.3V AVDD, 1.5V DVDD, and 1.8V DOVDD
 - standby: 267 μW typical @ 3.3V AVDD, 1.5V DVDD, and 1.8V DOVDD
- temperature range:**
 - operating: -40°C to +105°C sensor ambient temperature (operating sensor ambient temperatures above +60°C may result in degraded image quality)
- output interfaces:** 10-bit parallel DVP
- output formats:** up to 18-bit combined RAW, separated 10-bit RAW, 8-/10-bit YUV422
- lens size:** 1/2.7"
- input clock frequency:** 6 - 27 MHz
- max S/N ratio:** 39 dB
- dynamic range:** 115 dB
- maximum image transfer rate:** 30 fps full resolution
- sensitivity:** 3650 mV/lux-sec
- scan mode:** progressive
- shutter:** rolling shutter
- maximum exposure interval:** 838 x t_{row}
- pixel size:** 4.2 μm x 4.2 μm
- dark current:** 2.5 mV/s @ 50°C junction temperature
- image area:** 5510.4 μm x 3418.8 μm
- package dimensions:**
 - aCSP™: 7795 μm x 7145 μm
