OV2715-1E full HD (1080p) product brief

OmniVision's True 1080p High Definition (HD) Video Image Sensor

available in
a lead-free
package

The OV2715-1E is a native 1080p high definition (HD) CMOS image sensor designed specifically to deliver HD video to security/surveillance applications. Built with OmniVision's proprietary OmniPixel3-HS™ technology, the 1/2.7-inch OV2715-1E addresses the low-light performance requirements of both IP cameras and HDcctv.

The OV2715-1E is one of the first no-compromise full 1080p HD sensors available on the market with a display resolution of 1920 x 1080 pixels while operating at 30 frames per second. The sensor delivers low-light sensitivity of 3700 mV/lux-sec and a peak dynamic range of 69 dB. This enables cameras to operate in virtually every lighting condition from bright daylight to nearly complete darkness, a critical capability for security and surveillance cameras.

The sensor provides full frame, sub-sampled or windowed 10-bit images in RAW RGB format via the digital video port with complete user control over image quality. It incorporates advanced image processing functions, including exposure control, gain control, white balance, lens correction and defective pixel correction, and is fully programmable through the serial camera control bus (SCCB) interface.

Offering a zero degree chief ray angle, the OV2715-1E allows for the clearest possible picture and best-in-class image quality. The OV2715-1E is capable of operating within a temperature range of -30°C to +85°C, enabling its implementation in indoor and outdoor security and surveillance applications.
