## 0.4 mm Pitch, 1.5 mm Board-to-Board Connectors with Dual Shields

#### FX12 Series

# Patent Pending Header-side shield Receptacle-side shield Wetal filtings KaiLapTech.com

#### **■**Features

#### 1. Dual shields

Built-in shield plates and metal fittings in the plugs and receptacles prevent electromagnetic emission and external interference on the entire  $360^{\circ}$  periphery of mated connectors.

#### 2. Low-Profile

Board-to-Board distance of 1.5 mm and reduced PCB mounting pattern allows use in applications where space is limited.

3. Self-alignment leature in the plug and receptacle allows mating / un-mating in limited spaces.

#### 4. Consistent mated retention force

Indents in the shield plates and contact configuration assure consistency of the mated retention forces irrespective of the contact numbers. Positive "click" sensation confirms fully mated condition.

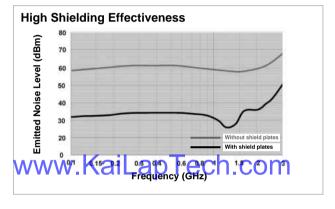

#### 5. Solder wicking prevention

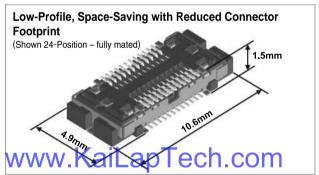

Nickel plating barrier on the contacts prevents solder compound intrusion (wicking) into the contact engagement areas.

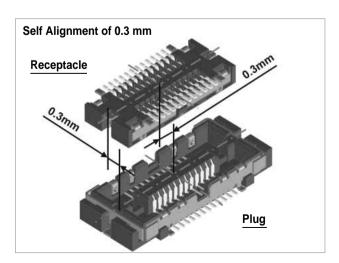

6. Board placement with automatic equipment
Packaged on tape and reel) the connectors have flat areas
(0.8mm) to allow use of vacuum nozzles.

#### 7. RoHS Compliant

All components and materials comply with the requirements of the EU Directive 2002/95/EC.

# 1/4-inch, 5-Megapixel SOC Image Sensor Optimized for High-Volume Mobile Markets

single chip, bimed at offering cost efficiencies that serve the high-volume autofocus (AF) camera phone market. The system-on-a-chip (SOC) sensor features OmniVision's 1.4 micron OmniBSI™ backside illumination architecture to deliver excellent pixel performance and best-in-class low-light sensitivity, while enabling ultra compact camera module designs of 8.5 mm x 8.5 mm with <6 mm z-height. The OV5640 provides the full functionality of a complete camera, including anti-shake technology, AF control, and MIPI while being easier to tune then two-chip solutions, making it an ideal choice in terms of cost, time-to-market and ease of platform integration.

The OV5640 enables 720p HD video at 60 frames per second (fps) and 1080p HD video at 30 fps with complete user control over formatting and output data transfer. The 720p/60 HD video is captured in full field of view (FOV) with 2 x 2 binning, which doubles the sensitivity and improves the signal-to-noise ratio (SNR). Additionally, a unique post-binning re-sampling filter function removes zigzag artifacts around slant edges and minimizes spatial artifacts to deliver even sharper, crisper

The OV564D detivers a complete 5-megapixer camera solution on a color images. To fur ther improve camera performance and user single chip, aimed at offering cost efficiencies that serve the high-volume autofocus (AF) camera phone market. The system-on-a-chip (SOC) sensor features OmniVision's 1.4 micron OmniBSI™ image preview and zoom.

The OV5640 offers a digital video port (DVP) parallel interface and a high-speed dual lane MIPI interface, supporting multiple output formats. An integrated JPEG compression engine simplifies data transfer for bandwidth-limited interfaces. The sensor's automatic image control functions include automatic exposure control (AEC), automatic white balance (AWB), automatic band filter (ABF), 50/60 Hz automatic luminance detection, and automatic back level calibration (ABLC). The OV5640 delivers programmable controls for frame rate, AEC/AGC 16-zone size/position/weight control, mirror and flip, cropping, windowing, and panning. It also offers color saturation, hue, gamma, sharpness (edge enhancement), lens correction, defective pixel canceling, and noise canceling to improve image quality.
